

AAA8 Supports Efforts to Develop the Region's Home Health Provider Cooperative

In partnership with The Ohio State Univ. Cooperative Development Center's Tom Snyder, Ph.D., who develops regional cooperatives, AAA8 has worked with its provider representatives to conduct a feasibility study to determine the potential for a working cooperative among the region's home health care providers focusing on common, critical and acceptable issues. In April, the work group formally voted to move forward with development of the cooperative and formalizing by-laws. The Cooperative Steering committee is currently conducting a staffing survey and requests that all Home Health Agencies whose staffing includes RNs, LPNs, STNAs or HHAs **please participate in a survey. Response deadline is May 15.** Survey results will be shared at the next coop meeting.
